Partnership opportunity for an Open Call: "**Preserving and Enhancing Cultural Heritage with Advanced Digital Technologies**"

Dear member,

We are pleased to inform you that our member [Karadag Development Agency](#), is looking for partners outside Turkey to complete a consortium for their project proposal CULTinDIGI – Past for Future Cultural Heritage in Digital Inventory of Şanlıurfa prepared for the call **HORIZON-CL2-2021-HERITAGE-01-04: Preserving and Enhancing Cultural Heritage with Advanced Digital Technologies**.

As you can see in the [Draft Work Programme 2021-2022 \(page 45\)](#), the call will be opened on the 15th of April 2021 with a **deadline for applications by the 1st of September 2021**. This call aims to implement digital technologies, from 3D simulation to artificial intelligence and virtual/augmented reality to be used to ensure preservation and wide access to cultural heritage and the arts.

As you may see in its [Partner Search Profile](#), **CULTinDIGI** through the digital inventory aims to verify the data in the literature against field realities, actual measurements, and assessment of the state of all types of assets present in the whole Şanlıurfa province and to prepare a guide for further monitoring and conservation of these sites and monuments. The main goal of the internet-based inventory system for **Cultural Heritage** is not just to digitally preserve heritage sites at risk, but also to make their stories and the data collected available to future generations of researchers, educators and students, to make that information easily accessible from everywhere and also to support decisions about conservation interventions.

If you might be interested in being part of this proposal, please contact our colleague [Julia COLOMER](#) or [Emine ARSLAN](#). We would appreciate if you could send us a brief indication of your profile and your reasons for being interested in it.
